

CREATING HTML PAGES

WEBDEV@RGU

TODAY

Going to look at how we can create an HTML page from a 'template'. We'll use:

[HTTP://WWW.RGU.AC.UK](http://www.rgu.ac.uk)

Two parts to this:

1. Looking at the template and splitting it into different sections
2. Creating the HTML for these individual sections

TEMPLATE DECONSTRUCTION

THIS IS THE PAGE WE'LL BE LOOKING AT
